Sir:

This is in response to the final Office Action dated December 20, 2005.

In the Claims:

1-19. (withdrawn)

20. (currently amended) A method of potentiating an immune response against an antigen comprising one or more B-cell antigenic epitopes and/or one or more T-cell antigenic epitopes in an animal, said method comprising the step of administering to said animal an said antigen and an effective amount of an adjuvant, wherein said adjuvant is a papaya mosaic virus (PapMV), or a virus-like particle (VLP) derived from comprising PapMV coat protein or modified PapMV coat protein, said PapMV coat protein or modified
